

## What are the advantages of my employees using Push-to-Talk (PTT) radios?

### One PTT

Imagine your team's communications at its most dynamic and connected. That's the power of Kenwood's push-to-talk (PTT) radios. Employees can talk on the go—to the entire fleet or one contact—with just a push of a button. There's no need for them to access cellular applications, eliminating productivity killers such as texting and mobile games. Talk about efficiency.

PTT radios also align your communication practices with today's distracted driving legislation. Criminal charges and increased insurance costs: these are the risks you face when your employees use cellphones while driving. Across Canada, distracted driving laws only permit the use of hands-free devices that are activated with a single touch. Kenwood's PTT functionality makes your communications safe for the road, so your team can focus on the job at hand.

## What are the benefits of OnQ's radio network coverage?

### Tailored to Your Needs

As your business grows and expands into new provinces, so should your routes of communication. That's why the OnQ Network brings you service exactly where you need it. Anywhere your business takes you, our network has you covered.

To get your workforce connected, our dealers bring decades of radio programming experience. Whether you're a small business or a large enterprise, our specialized expertise allows us to customize and scale your coverage to your company's needs.

## What radio functions will make my job as a manager easier?

### Your Fleet at Your Fingertips

Relevant and instantaneous communication is more important today than ever. For your business to survive and thrive, you need the ability to connect with your team at a moment's notice. On the road or in the office, the OnQ Network keeps your entire operations in touch with just a push of a button.

It's easy to make a call—push one button and talk instantly. Use the group-calling feature to reach your entire fleet, or talk one-to-one for private calls. If you're taking on a special project or job, our experienced dealers can add on temporary radios with ease. And, you can feel secure knowing your network is protected through our private, encrypted system. Our radios require minimal repair and are field tried and tested to ensure downtime is a rare occurrence.
